SPECIAL LIST 1947

ARMACOST & ROYSTON, INC.

CATTLEYA HYBRIDS FROM 11½"

This price list is special in the sense that it lists various sized plants of hybrids of which we have but a very limited quantity available. Among them are some of the finest Cattleyas we have raised at West Los Angeles and we know from the inquiries we are receiving that many of these at least will prove of great interest.

While the descriptions are of necessity brief we believe they are adequate for the purpose. The items listed here are not included in the Spring, 1947 Price List for the reason that in many cases there are only one or two plants available and so it will be seen that orders can only be accepted in strict rotation and all subject to the stock being available.

We will be glad to give any further information desired and as always, we pack securely, free of charge.

It will be readily understood that it is impossible to keep orchid plants stationary with regard to pot size whilst they are catalogued. Potting must be done as it becomes necessary. Because of this we shall substitute sizes of plants in filling orders, unless we are specifically instructed not to do so.

SPECIAL NOTE

In the old days we invited all customers to visit our nursery but, as is well known, there has been a tremendous increase in the number of people interested in Orchids. General conditions have prevented our getting together a sufficiently experienced sales personnel to take care of the many people wishing to visit and select their plants and therefore it is a physical impossibility for us to wait on customers at the nursery. We are therefore obliged to offer the present list as for mail and telephone orders only.

Please cooperate with us to the extent of not requesting personal selection of your orders but send us your requirements by mail or by telephone and we will give them careful and prompt attention.

Cross No.	Name, Parentage and Description	Size	Each
	BLC. GORDON HIGHLANDER (Bc. Mme. C. Maron x Lc. Aphrodite) A well-known Brassocattleya. Very large. Sepals and petals are deep lavender to light rose. Lip dark purple at the edges with a green-yellow throat.	6" 7"	\$50.00 60.00
	C. LEDA (C. Dowiana aurea x C. Percivaliana) This old hybrid is well-known. Exceedingly free late fall and winter bloomer. Sepals and petals are bright rose. Dark crimson-purple lip with much gold veining.	5" 6"	20.00 30.00
	C. PALATINE (C. Octave Doin x C. Remy Chollet) A winter blooming Cattleya first raised in Europe. It is a pleasant color and is free flowering, blooming in the late fall.	4 1/2" 5" 5 1/2" 6"	20.00 25.00 27.50 30.00
	LC. PHILOMELA (Lc. Lustre x L. tenebrosa) Variable as to season but intensely rich in color and exceedingly strong growing. Sepals and petals are light to deep purple, the lip much darker. The whole flower is sometimes suffused with orange-bronze.	4" 4 1/2" 5" 5 1/2" 6" 7"	20.00 25.00 30.00 35.00 40.00 50.00
54	C. H. S. LEON (C. gigas x C. Schroederae) Vigorous, free flowering Cattleya blooming late fall and early winter. Sepals and petals medium lavender, lip darker with a yellow to orange throat.	5" 6" 7"	20.00 30.00 35.00
65	C. SANTA MONICA (C. Lord Rothschild x C. Mendelii) One of our earlier hybrids but very worthwhile. Strong growing and free flowering. Usually winter and early spring but somewhat variable. Sepals and petals deep lavender to light rose. The lip which is very pretty is crimson purple at base with strong orange throat.	5"	25.00
80	C. GENERAL PULTENEY (C. Octave Doin x C. Trianae) Well-known hybrid. Our strain being made from C. Trianae var. Edgar Knight and a fine variety of C. Octave Doin. The flowers are large. Sepals and petals deep lavender-pink, sometimes ribbed with strong crimson-purple. The lip dark crimson-purple with a yellow throat. Late fall and winter bloomer.	5" 5 1/2" 6" 7"	25.00 30.00 35.00 40.00
111	LC. MONTEREY (C. Trianae, Grand Monarch x Lc. Lustrissima) Very pretty winter and early spring hybrid. Flowers large. Sepals and petals are silver-lavender. The lip is darker with a rich throat.	5" 5 1/2"	25.00 30.00
113	LC. NOELLE (Lc. Callistoglossa x C. Carmen) A pretty hybrid. Strong, free flowering blooming usually in spring. Flowers large. Sepals and petals light to medium rose. Lip dark rose-purple with yellow throat.	5"	25.00
153	LC. QUEEN MARY (C. Peetersii x Lc. Lustre, Westonbirt var.) Strong growing Lustre hybrid and free flowering. Sepals and petals are deep rose. Lip intense dark crimson-purple. The season is variable.	5"	30.00
161	LC. BRACEYANA (Lc. Lustre, W'birt. var. x C. labiata, W'birt. var.) One of our best introductions. Flowers large of noble proportions. Sepals and petals are deep rose to rose-purple. The lip intense crimson-purple with some orange in the throat. Usually summer and early fall bloomer, but can be variable.	4" 4 1/2" 5" 5 1/2" 6"	35.00 40.00 50.00 60.00 75.00

Cross No.	Name, Parentage and Description	Size	Each
169	LC. CONQUISTADOR (C. labiata, W'birt. var. x Lc. Morvyth mag.) Similar to No. 161, even richer in color but not quite so fine a shape. Blooming around the same time it is a high quality Cattleya.	4 1/2" 5" 5 1/2" 6" 7"	\$40.00 50.00 60.00 75.00 85.00
181	C. MOUNT ROYAL (C. Enid x C. Maggie Raphael) Our strain of this hybrid is well-known. It is a strong growing Cattleya. Very free blooming with several flowers to the spray. The flowers large and of beautiful shape. Rich in color the sepals and petals being bright warm rose and the lip darker with a yellow throat.	4" 4 1/2" 5" 5 1/2" 6" 7"	20.00 25.00 30.00 40.00 50.00 55.00
402	LC. ELECTA (C. Octave Doin x Lc. Lustre, W'birt. var.) A fine hybrid from Lustre. Strong growing and rich in color. Sepals and petals are rose-purple. Lip darker with an orange throat. A variable bloomer.	5 1/2" 6"	50.00 60.00
421	C. MAGGIE RAPHAEL (C. Dowiana aurea x C. Trianae) A late fall and winter bloomer. A very worthwhile primary hybrid. Color is deep rose to rose-purple. Large flattish lip dark in color with throat veined with deep orange.	5" 6"	35.00 45.00
439	LC. MADAME BRASSEUR HYE (Lc. Aphrodite x C. gigas v. Meteor) A fine strain of this hybrid blooming usually in the spring. An extremely vigorous grower and free flowering. Flowers large. Sepals and petals rose with a darker lip.	6"	35.00
441	C. SIR WALTER SCOTT (C. Harold x C. gigas) Fine spring and early summer bloomer resembling C. gigas. However, it is much freer flowering.	5" 6"	30.00 40.00
443	C. GULLIO (C. Sir Walter Scott x C. gigas v. Meteor) A hybrid from the above with C. gigas added. Extremely free flowering blooming in spring and early summer. Very fine cut flower variety.	5 1/2" 6"	35.00 40.00
450	LC. BEN NEVIS (C. Sir Walter Scott x Lc. Lustrissima, W'birt. v.) A strong growing Lustre hybrid producing extra large flowers. Blooms usually in the spring and early summer, but is variable. Sepals and petals deep lavender to light rose. Lip intense crimson-purple with orange throat.	5"	40.00
460	C. ALTADENA (C. Intertexta x C. Hardyana) Variable season. Flowers large and medium to rich in color.	4 1/2" 5"	17.50 25.00
479	C. PEETERSII (C. Hardyana x C. labiata, W'birt. var.) Our strain of this hybrid is possibly the best yet raised. It is extremely free flowering. Season late summer and fall. Flowers large beautifully shaped and exceedingly rich in color.	4 1/2" 5" 5 1/2" 6"	25.00 30.00 35.00 45.00
496	C. ACHINE (C. labiata x C. Maggie Raphael) Made with superior parents this is a fine strain of this hybrid. It is exceedingly strong growing and free flowering. Fine for cut flowers. Flowers are large and several to the spray. Medium to deep rose sepals and petals with a dark lip heavily veined with gold.	5" 5 1/2" 6" 7"	30.00 35.00 40.00 50.00

Cross No.	Name, Parentage and Description	Size	Each
189	LC. CONQUISTADOR (C. labiate, W'bit. var. x C. Morvith mag.) Similar to No. 181, even richer in color but not quite so fine a shape. Blooming around the same time it is a high quality Cattleya.	4 1/2" 2 1/2" 2 1/2" 6" 7"	\$40.00 50.00 50.00 75.00 85.00
181	C. MOUNT ROYAL (C. Enid x C. Maggie Raphael) Our strain of this hybrid is well-known. It is a strong growing Cattleya. Very free blooming with several flowers to the spray. The flowers large and of beautiful shape. Rich in color the sepals and petals being bright warm rose and the lip darker with a yellow throat.	4" 4 1/2" 5" 5 1/2" 6" 7"	30.00 35.00 30.00 40.00 50.00 55.00
402	LC. ELECTA (C. Octave Doin x C. Luster, W'bit. var.) A fine hybrid from Luster. Strong growing and rich in color. Sepals and petals are rose-purple. Lip darker with an orange throat. A variable bloomer.	5 1/2" 6"	50.00 60.00
421	C. MAGGIE RAPHAEL (C. Downia aurea x C. Trianae) A late fall and winter bloomer. A very worthwhile primary hybrid. Color is deep rose to rose-purple. Large flattish lip dark in color with throat veined with deep orange.	5" 6"	35.00 45.00
439	LC. MADAME BRASSEUR HYE (C. Aphrodite x C. gigas v. Meteor) A fine strain of this hybrid blooming usually in the spring. An extremely vigorous grower and free flowering. Flowers large. Sepals and petals rose with a darker lip.	6"	35.00
441	C. SIR WALTER SCOTT (C. Harold x C. gigas) Fine spring and early summer bloomer resembling C. gigas. However, it is much freer flowering.	5" 6"	30.00 40.00
443	C. GULLIO (C. Sir Walter Scott x C. gigas v. Meteor) A hybrid from the above with C. gigas added. Extremely free flowering blooming in spring and early summer. Very fine cut flower variety.	5 1/2" 6"	35.00 40.00
450	LC. BEN NEVIS (C. Sir Walter Scott x C. Lustrissima, W'bit. v.) A strong growing Luster hybrid producing extra large flowers. Blooms usually in the spring and early summer, but is variable. Sepals and petals deep lavender to light rose. Lip intense crimson-purple with orange throat.	5"	40.00
460	C. ALTADENA (C. Infanta x C. Harbiana) Variable season. Flower large and medium to rich in color.	4 1/2" 5"	17.50 25.00
479	C. PETERSEN (C. Harbiana x C. labiate, W'bit. var.) Our strain of this hybrid is possibly the best yet raised. It is extremely free flowering. Season late summer and fall. Flowers large beautifully shaped and exceedingly rich in color.	4 1/2" 5" 5 1/2" 6"	35.00 30.00 35.00 45.00
495	C. ACHINE (C. labiate x C. Maggie Raphael) Made with superior parents this is a fine strain of this hybrid. It is exceedingly strong growing and free flowering. Fine for cut flowers. Flowers are large and reveal to the spray. Medium to deep rose sepals and petals with a dark lip heavily veined with gold.	5" 5 1/2" 6" 7"	30.00 35.00 40.00 50.00

Cross No.	Name, Parentage and Description	Size	Each
530	C. TITRIANAE (C. Trianae x C. Tityus) A very worthwhile hybrid blooming in winter and early spring. Flowers are large. Sepals and petals deep lavender to light rose. Dark rich lip with a gold area in the throat.	5" 5 1/2"	\$30.00 35.00
535	LC. BRITISH QUEEN ALBA (Lc. Britannia alba x C. speciosissima v. Stanleyii) A well-known alba of good shape. Sepals and petals white, sometimes diffused light lavender particularly on the reverse side. Lip shows strong influence of speciosissima with light yellow throat veined with gold.	4 1/2" 5"	25.00 30.00
602	C. JICARILLO (C. Fabianid x C. Peetersii) One of the richest colored Cattleyas we have raised. Exceedingly free, the flowers are large. Warm rose-purple sepals and petals with a darker lip.	4" 4 1/2" 5" 5 1/2" 6"	25.00 30.00 40.00 50.00 60.00
878	C. FABIANID (C. Enid x C. Fabia) Well-known hybrid. Strong growing. Very free flowering. Somewhat variable as to season but late fall and early winter predominating. Sepals and petals light to deep rose. Lip dark, rich crimson-purple with light yellow and gold veining in the throat.	4" 4 1/2" 5" 5 1/2" 6" 7"	15.00 20.00 25.00 30.00 35.00 40.00
884	LC. SOULANGE (C. Dowiana aurea x Lc. Lustre, W'birt. var.) One of the best of the primary Lustre hybrids. Exceedingly free and strong growing. Flowers are large and good shape. Sepals and petals are warm rose. Lip dark crimson-purple with yellow and orange in the throat.	4"	25.00
945	LC. SEAFORTH (C. Intertexta x Lc. Locarno) One of the freest flowering Laeliocattleyas we know and of unusually good shape. Variable as to season but late fall and early winter seem to predominate. Sepals and petals are deep lavender to light rose. The large lip is rich crimson with yellow and orange in the throat.	4" 4 1/2" 5" 5 1/2" 6" 7"	35.00 40.00 50.00 55.00 65.00 70.00
965	BLC. ENCINO (Bc. Nestor x Lc. Valencia) A fine Brassocattleya somewhat variable but fall and winter usually. Flowers are large and of good shape. Medium lavender to light rose sepals and petals. Lip dark rich purple with a light area in the throat veined with gold.	5" 7"	35.00 55.00
1001	LC. LABOLSA (Lc. Wellsiana x Lc. Sargon mag.) The strength and free flowering quality of both parents are reproduced in this hybrid. It is exceedingly free flowering with flowers of great quality possessing good shape and rich color. Variable as to season of bloom.	5" 5 1/2" 7"	40.00 45.00 60.00
1010	C. RODOLPH (C. Warneri Ardenholme var. x C. Remy Chollet) In habit of growth this is the most spectacular Cattleya we have raised or seen. It is free flowering usually summer and early fall. The flowers are of extra fine form, several to the spray, often five or six. Of good shape the sepals and petals are deep lavender to light rose. The well displayed lip is rich crimson with a light area in the throat. Rodolph has so far proved to be most difficult to get seed from, but if this can be accomplished the results, we feel sure, will be well worthwhile.	4 1/2" 5" 5 1/2" 6" 7"	40.00 50.00 60.00 75.00 85.00

Cross No.	Name, Parentage and Description	Size	Each
1026	LC. FASCINATOR-MOSSIAE (C. Mossiae x Lc. Fascinator) This is a well-known early spring bloomer. Very free. Light to medium in color.	4 1/2" 5"	\$12.50 17.50
1039	LC. FASCINATOR-MOSSIAE ALBA (C. Mossiae Reineckiana x Lc. Fascinator alba) An alba form of the above but a larger and finer flower. A really worthwhile spring bloomer.	4 1/2" 5" 5 1/2"	30.00 40.00 50.00
1066	LC. MRS. HAROLD LLOYD (Lc. Aphrodite x C. Van Houtte) One of our older hybrids of great strength and free flowering qualities blooming early in the year. Flowers are large. Warm deep lavender sepals and petals with a dark crimson lip.	5" 5 1/2" 6"	30.00 35.00 40.00
1084	C. PRINCE SHIMADZU (C. Tityus v. The Pearl x C. Hardyana, Westonbirt var.) Our strain of this hybrid was raised from very superior forms of both parents and it is exceedingly strong growing and a worthwhile hybrid. Blooming season usually late spring and early summer. Flowers large and well shaped. Sepals and petals warm rose-pink with a dark crimson lip.	5" 5 1/2"	40.00 45.00
1086	C. LA SOLEDAD (C. H. S. Leon x C. Tityus v. The Pearl) This hybrid is of great strength and exceedingly free flowering. The flowers are large, several to the spray. Sepals and petals lavender-pink with darker lip. Usually spring and early summer, but sometimes variable.	4 1/2" 5" 5 1/2" 6" 7"	17.50 25.00 30.00 35.00 45.00
1104	C. SUSANNAH (C. triumphans x C. Dinah A. M.) A fine hybrid strongly resembling C. Dinah but with a much longer flower spike with the flowers well spaced. A most worthwhile cut flower Cattleya and we think a worthy parent. Blooms usually late spring and summer.	4" 5" 5 1/2"	25.00 40.00 50.00
1185	LC. YENBO (C. H. S. Leon x Lc. Marie Dobrott) A spectacular grower of great strength. Very free flowering. Flowers are large. Light to medium lavender sepals and petals with darker lip. Yenbo has fine form and is a very worthwhile cut flower variety.	5 1/2" 6" 7"	50.00 60.00 75.00
1199	C. CORYDON (C. Armainvillierense x C. Trianae v. Edgar Knight) A very free flowering winter and early spring bloomer of medium color. Sepals and petals are silver-lavender, lip darker with a yellow and orange area in the throat.	4" 5" 5 1/2" 6" 7"	15.00 20.00 25.00 30.00 40.00
1232	C. LOS ALTOS (C. Sir Walter Scott x C. Hentschelii) Exceedingly free flowering spring bloomer greatly resembling C. gigas of which it is largely composed. It is similar in color and form but much freer bloomer.	4" 4 1/2" 5" 5 1/2" 6" 7"	12.50 15.00 20.00 25.00 30.00 35.00
1262	C. GAY GORDON (C. Van Houtte x C. Hardyana, W'birt. var.) A strong Cattleya exceedingly free flowering. Flowers are large and of excellent shape. Good medium color. Spring and early summer.	4 1/2" 5"	25.00 30.00
1265	C. CLARIBELLE (C. Thorout x C. Dinah A. M.) A spectacular Cattleya producing several extremely large flowers to the spray. Bright warm rose-pink color with a darker lip and some yellow in the throat. This hybrid, we believe, will prove a worthwhile parent, possibly even better than its parent Dinah.	4" 4 1/2" 5" 5 1/2" 6"	25.00 30.00 40.00 50.00 60.00

Cross No.	Name, Parentage and Description	Size	Each
1287	LC. LUSTROUS (C. Hesperus x Lc. Lustre) Showing clearly the Lustre habit this hybrid produces large flowers of good medium color. Season somewhat variable but generally summer.	4 1/2"	\$25.00
1358	C. DIONYSIUS (C. Fabia x C. gigas) Our Dionysius has all the free flowering qualities usually expected in this hybrid with, we think, added color. It is a well worthwhile summer and early fall bloomer.	5" 5 1/2" 6"	30.00 35.00 40.00
1359	LC. OROSI (Lc. Marie Dobrott x C. Tityus v. The Pearl) Like most hybrids from Lc. Marie Dobrott this is an exceedingly strong and spectacular grower and is very free flowering. Flowers large, several to the spray. Sepals and petals a delightful shade of lavender-rose with a darker lip and yellow to orange throat. Usually summer but is variable.	5" 5 1/2" 6"	45.00 55.00 65.00
1376	LC. MERCED (Lc. Marie Dobrott x C. labiata, W'birt. var.) A happy combination of parents this hybrid is exceedingly strong growing. Several flowers to the spray all of which are large and good color. The C. labiata parent was the finest form of labiata we know of. Fall and early winter.	5" 5 1/2" 6" 7"	30.00 35.00 40.00 45.00
1424	LC. LOLITA (Lc. Massasoit x C. Santa Monica) Very pleasing hybrid in its warmth of color. Sepals and petals are warm rose-pink. Lip dark crimson-purple with some orange in the throat. Usually summer but is variable.	5 1/2"	30.00
1429	LC. PICACHO (Lc. Mrs. Harold Lloyd x Lc. Camilla) Strong growing pretty hybrid variable as to season. Flowers are large. Deep lavender to light rose sepals and petals with darker lip and some orange in the throat.	5" 5 1/2"	30.00 35.00
1474	C. MANOA (C. H. S. Leon x C. labiata) A pretty Cattleya. Light lavender sepals and petals with a slightly darker lip. Usually a summer bloomer but is variable.	5 1/2"	25.00
1513	C. MARTA (C. Trianae var. Mrs. Dixon x C. Tambora) One of the few Cattleyas we know of where the lip is usually lighter in color than the sepals and petals which are light lavender. The lip is creamy white slightly flushed lavender. A very pretty delicate flower blooming in the winter and early spring.	4" 4 1/2" 5" 5 1/2"	15.00 20.00 25.00 30.00
1515	C. MONTEBELLO (C. General Pulteney x C. Remy Chollet) A very worthwhile winter hybrid. A strong grower producing a fine flower similar to C. Remy Chollet but much darker in the lip and with more substance.	4" 4 1/2" 5" 5 1/2" 6"	25.00 30.00 35.00 40.00 45.00
1569	LC. PALO ALTO (Lc. Wellsiana x C. Robert de Wavrin) An early spring bloomer. Although subdued in color it is nevertheless very pretty as are most C. Robert de Wavrin hybrids. Sepals and petals are light to medium lavender. Lip is slightly darker with a strong orange throat.	4 1/2" 5" 5 1/2" 6" 7"	20.00 25.00 30.00 40.00 50.00
1642	LC. MONETA (C. Harrisoniana x Lc. Marie Dobrott) Dainty medium sized flower. Light purple sepals and petals and dark crimson-purple lip with some yellow in the throat. Flowering season usually summer.	4"	10.00

Cross No.	Name, Parentage and Description	Size	Each
1664	BC. GOLIATH (C. labiata x Bc. Thorntonii) A typical second generation Brassocattleya but larger than most. Sepals and petals warm rose-pink. Lip rose-pink at the edge with greenish-yellow throat.	5" 6"	\$35.00 45.00
1745	BLC. JOLLITY (Lc. Caprice x Bc. Mrs. J. Leemann) An unusual colored Brassocattleya and a beautiful one. Flowers are large. Sepals and petals are light rose suffused orange to apricot. Lip is darker showing the same suffusion and making a most attractive flower.	5" 5 1/2"	50.00 60.00
1749	BLC. MONTECITO (C. General Pulteney x Bc. Caligula v. excelsis) A large and most attractive Brassocattleya. Sepals and petals light to medium lavender but the lip is intensely dark crimson-purple.	5"	40.00
1753	LC. EL CAPITAN (Lc. Titymoma x Lc. Hilary) Some exceedingly fine flowers have appeared in this cross. The plants offered are unselected and are a good speculation.	4 1/2" 5"	30.00 40.00
1772	LC. EL CENTRO (Lc. Aphrodite x C. Woltersiana) An exceedingly free flowering spring and early summer bloomer. The sepals and petals are light lavender and the latter are sometimes ribbed with crimson. The lip dark crimson-purple.	4" 5"	15.00 25.00
1792	C. MRS. ED ROEHRS (C. Prince John x C. Dowiana aurea) A well-known yellow hybrid. Sepals and petals are lemon to cadmium yellow. The lip is rich crimson heavily veined with gold.	5 1/2"	40.00
1823	BLC. OJAI (Lc. Luminosa aurea x Bc. Pervenusta) There is an extreme range of color in this Brassocattleya. All are varying shades of yellow. They are usually sweetly scented and for the most part the colors are most attractive, some extraordinarily so. The plants offered are unselected varieties.	5 1/2" 6"	45.00 55.00
1847	LC. LAPWAI (Lc. Gipsy x C. Mrs. Stewart Pool) A medium size flower blooming late summer and fall of full shape. Sepals and petals an intense crimson color with the lip darker and some orange in the throat.	5"	35.00
1917	LC. TALLADEGA (C. General Pulteney x Lc. Mrs. Harold Lloyd) Resembling a much improved Trianae, this hybrid blooms usually late winter and early spring.	4 1/2" 5"	25.00 30.00
1919	LC. TOHOPEKA (C. General Pulteney x Lc. Sunbelle) Winter and spring bloomer. Flowers large and of fine substance and good color.	4 1/2"	15.00
1949	LC. WELLINGTON (Lc. Wellsiana x C. Trimos) A free flowering spring bloomer. Flowers of good size. Sepals and petals are deep lavender to light rose. Lip darker with yellow throat.	4" 4 1/2" 5"	15.00 20.00 25.00
1979	BLC. DANIEL BOONE (Lc. Tenemilmar x Bc. Mrs. J. Leemann) For those who like unusual color tones this hybrid should be of interest. There is a wide variation but generally speaking the colors are deep yellow and orange flushed lavender. They are most attractive and unusual.	5" 6"	30.00 50.00

Cross No.	Name, Parentage and Description	Size	Each
2508	LC. EDITH WILLKIE (Lc. Mrs. Harold Lloyd x C. Dinah A. M.) We have sold so many plants of this hybrid that it should be well-known. It is a spectacular orchid from point of its growth, size, color and quantity of the flowers. We have used selected forms of this hybrid as a parent and we are sure that other growers will also. It has strength, flower production, color and amazing vigor.	4" 4 1/2" 5" 5 1/2" 6" 7"	\$25.00 30.00 35.00 40.00 50.00 65.00
2509	LC. ALTA MESA (C. Hardyana x Lc. Mrs. Harold Lloyd) We have a few remaining plants of this good hybrid which shows strongly the influence of Mrs. Harold Lloyd.	5"	25.00
2510	C. CONSUMMATION (C. Tityus var. The Pearl x C. Dinah A. M.) A fine C. Dinah hybrid resembling this parent as do most of its hybrids. Flowers have rich warm rose sepals and petals. The lip darker with yellow in the throat. Variable but spring and summer usually.	4" 4 1/2" 5" 5 1/2"	25.00 30.00 35.00 40.00
2511	C. HEATHERWOOD (C. Tityus var. The Pearl x C. Mossiae var. Countess Grey) When remaking an older hybrid we endeavor to use superior parents and in this case the results are very definite. Our strain of C. Heatherwood is a superior one from every point of view. The flowers are larger, of better shape and richer in color.	4" 4 1/2" 5" 5 1/2" 6"	15.00 20.00 30.00 40.00 50.00
2527	BLC. MARION TALLEY (Lc. Massasoit var. The Chief x Bc. Mrs. J. Leemann) A large Brassocattleya of good form with a great variation in color. Some have chartreuse sepals and petals with lips of the same color suffused with light lavender. Also some are of the conventional rose slightly shaded with yellow but all are distinctly worthwhile. The plants offered are unselected varieties.	5" 6"	40.00 60.00
2534	LC. KEOKUK (Lc. Marie Dobrott x C. Hardyana) Extra large flowers favoring Lc. Marie Dobrott. Variable in flowering season, early fall predominating.	5" 5 1/2" 6"	30.00 40.00 50.00
2546	LC. SAM HOUSTON (Lc. Marie Dobrott x Lc. Morvyth mag.) One of the finest Cattleya hybrids we have raised. It is a strong grower. Flowers are large of fine form and good texture. Sepals and petals are predominantly a deep warm rose with an intense crimson lip with gold or orange area in the throat. The flowering season is variable as there are nearly always some plants in bloom.	4" 4 1/2" 5" 5 1/2" 6" 7"	25.00 30.00 40.00 50.00 60.00 75.00
2562	LC. GITCHE MANITO (Lc. Morvyth mag. x C. Gay Gordon) Having one parent in common this is similar to No. 2546 but the average color is darker and the texture heavier. It is definitely one of our finest productions and it too is variable as to flowering season.	4" 4 1/2" 5" 5 1/2" 6" 7"	35.00 40.00 50.00 60.00 75.00 85.00
2564	LC. KOKOP (Lc. George Woodhams x C. Armstrongae) Where medium sized orchids of dainty appearance and good color are useful this hybrid will fill the bill. It is strong growing, very free flowering, flowers of heavy texture, medium in size. Sepals and petals range from light silvery-lavender to deep rose-purple. The lip is similar in shape to the C. Armstrongae parent but deeper color. Late summer and fall blooming although somewhat variable.	4 1/2" 5"	17.50 25.00

Cross No.	Name, Parentage and Description	Size	Each
2583	LC. HOLLYWOOD (C. Octave Doin x Lc. Marie Dobrott) A strong growing, free flowering hybrid. Sepals and petals are light to medium lavender. Lip dark purple with orange in the throat. Variable flowering season.	4" 4 1/2" 5" 5 1/2"	\$20.00 25.00 30.00 35.00
2611	LC. CABAZON (Lc. Titymoma x Lc. Marie Dobrott) An interesting hybrid of fine quality and well worthy of being considered as a parent. Extremely vigorous and free flowering. The flowers are large. Medium to deep lavender with a darker lip and much yellow and orange in the throat. A variable bloomer but spring and early summer prevail.	4" 4 1/2" 5" 5 1/2" 6"	25.00 30.00 35.00 45.00 55.00
2652	C. DELPHINE (C. Empress Frederick x C. Tityus) A nice spring and early summer hybrid varying in color from creamy white sepals and petals through varying shades of lavender to deep rose-purple with darker lip.	5" 5 1/2" 6"	25.00 27.50 30.00
2672	LC. OPATA (Lc. Wellsiana x C. Woltersiana) A pretty spring and early summer Cattleya although there is some variation in season. The sepals and petals are light to medium lavender. The lip is a darker purple.	5"	25.00
2694	C. INTERTEXTA (C. Mossiae x C. Warneri) Flowers extra large. Light to medium rose sepals and petals with darker lip and light yellow throat. Variable bloomer, winter and early spring predominating.	5" 5 1/2" 6"	25.00 30.00 35.00
2699	C. H. B. TURNER (C. Tityus x C. General Pulteney) Well-known and very worthwhile late winter and spring bloomer. Large flowers. Sepals and petals medium to deep rose-lavender. Lip intense dark crimson-purple with bright yellow throat.	5" 5 1/2"	25.00 30.00
2708	LC. TEXAS (C. Fabianid x Lc. Conquistador) Variable bloomer, fall predominating. This hybrid is quite variable in quality. Some of the finest Laeliocattleyas we have raised have appeared in this batch. They are large, of fine shape and substance and excellent color.	4 1/2" 5" 5 1/2" 6" 7"	30.00 35.00 40.00 45.00 50.00
2726	C. WILLIAM HALSTEAD (C. General Pulteney x C. Maggie Raphael) A pretty late fall and winter bloomer. Free flowering and rich in color.	4 1/2" 5" 5 1/2"	25.00 30.00 35.00
2739	C. HOPOCAN (C. General Pulteney x C. hivalnalis) A free flowering late fall and winter bloomer. Good medium color.	4 1/2" 5" 5 1/2" 6"	20.00 25.00 30.00 40.00
2762	C. BEACON (C. Mount Royal x C. Remy Chollet) A winter bloomer and very free. Flowers are large. Sepals and petals are light lavender-rose with darker lip.	4" 4 1/2" 5"	15.00 20.00 25.00
2769	C. LUMINARY (C. Nebo x C. Remy Chollet) Another winter bloomer from C. Remy Chollet. Very free flowering. The flowers are medium color with a bright attractive lip.	4" 4 1/2" 5" 5 1/2" 6"	15.00 20.00 25.00 30.00 35.00

Cross No.	Name, Parentage and Description	Size	Each
2770	C. EMPEROR (C. Nebo x C. Monarch) Good average color this hybrid is very free flowering blooming in the winter. Being closely related to No. 2762, and 2769 all three are good commercial varieties.	4" 4 1/2" 5"	\$15.00 20.00 25.00
2782	BLC. FESTIVITY (Blc. Caligula var. excelsis x C. Talisman) A very handsome and decorative Brassocattleya. The flowers are large and rich in color. Flowering season variable but usually winter and early spring.	4"	25.00
2789	C. NARCISSUS (C. Monarch x C. Profusion) Flowers extra large. Good form and color. The sepals and petals are pleasing shades of warm lavender and lavender-pink and it is very free flowering. Blooms in the spring.	4" 4 1/2" 5" 5 1/2" 6"	15.00 20.00 25.00 30.00 35.00
2791	C. KANAKUK (C. Profusion x C. Trianae v. Grand Monarch) A winter bloomer of medium to deep rose color and extremely free flowering. The flowers are large and of good shape.	4" 5"	15.00 25.00
2793	LC. ORENDA (C. Santa Monica x Lc. Marie Dobrott) A new hybrid of great merit. It grows with all of the vigor of the usual Lc. Marie Dobrott hybrids. The C. Santa Monica parent has passed on fine shape and texture. Sepals and petals bright deep lavender to light rose. The lip dark crimson-purple with some yellow in the throat. Some superb varieties have appeared in this batch of seedlings. A long extended season. We seem to have some flower at all times.	4" 4 1/2" 5" 5 1/2" 6"	25.00 30.00 35.00 40.00 50.00
2797	LC. KANAPIMA (C. Schroederiae x Lc. Marie Dobrott) A free flowering winter blooming Cattleya of soft and delicate coloring.	4"	15.00
2800	C. RASPAIL (C. Monarch x C. Schroederiae) A winter bloomer. Light in color and very free flowering.	4"	12.50
2850	LC. DOROTHY FRIED (Lc. Princess Margaret x C. Dinah A. M.) As may be expected from the parentage this is an exceedingly fine bold hybrid. For the most part they have perfect shape and balance. Large rose sepals and petals with a darker lip. The flowers have tremendous texture. Selected seedlings from this cross flowering for the first time have found purchasers at prices of \$100.00 and up. Season summer and fall. Also somewhat variable.	3 1/2" 4" 4 1/2" 5" 5 1/2" 6"	20.00 25.00 30.00 40.00 50.00 60.00
2867	BLC. FANATICO (Lc. Canberra Stonehurst var. x Bc. Mrs. J. Leemann) Flowers in this cross range in color from chartreuse through yellow to orange with some reddish-purple in the lips. There is great variation in color and form but all are interesting.	4" 4 1/2"	25.00 30.00
2894	LC. NACONO (Lc. Marie Dobrott x C. Mossiae) A good cut flower variety blooming in spring and summer. Also somewhat variable. Flowers are large on good stems. Sepals and petals light to medium lavender. Lip dark purple.	3 1/2" 4" 4 1/2"	15.00 20.00 25.00
2914	LC. NISKA (Lc. Doctor R. Schiffman W'birt. var. x L. purpurata) A spring bloomer similar to a fine Lc. Canhamiana. Sepals and petals deep lavender to light rose. Lip dark crimson-purple.	4 1/2" 5" 5 1/2"	20.00 25.00 30.00

Cross No.	Name, Parentage and Description	Size	Each
2930	LC. PROBITY (Lc. Marie Dobrott x C. Intertexta) Flowers large and rich in color. Winter and spring bloomer.	3 1/2" 5"	\$15.00 30.00
2967	C. MENOMINEE (C. Annie J. Lines x C. Mossiae) A winter and spring bloomer of good color and very free flowering.	4" 4 1/2" 5" 5 1/2" 6"	15.00 20.00 25.00 30.00 35.00
2974	C. WHITE CLOUD (C. Barbara Dane x C. Angelina) A heavy textured pure white with a strong yellow to orange throat. The flowers are large and of good form. A very distinct white Cattleya. The season is variable, but principally fall and early winter.	4" 4 1/2" 5" 5 1/2"	40.00 50.00 60.00 75.00
2977	C. ABUNDANCE (C. Talisman x C. Mossiae) A spring bloomer of good color and very free flowering. Sepals and petals are deep lavender to light rose. The lip similar to C. Mossiae but more solid.	4" 4 1/2" 5" 5 1/2"	15.00 20.00 25.00 30.00
2987	LC. CALI (Lc. Mrs. Harold Lloyd x C. Trianae v Imperator) A winter and early spring bloomer. Fine habit of growth and very free flowering. Sepals and petals warm deep lavender with an intensely dark crimson-purple lip.	4"	20.00
3016	C. GRANADA (C. Profusion x C. Empress Frederick) A spring and early summer bloomer. Very free. Flowers are large and of good shape. Sepals and petals are light to medium rose. Rich crimson-purple lip heavily veined with gold.	3 1/2" 4" 4 1/2" 5" 5 1/2" 6"	15.00 20.00 25.00 30.00 35.00 40.00
3017	C. DAVID CROCKETT (C. hivalis x C. Empress Frederick) Free flowering. Good size. Lavender to light rose sepals and petals. Lip darker. Winter and spring.	5 1/2"	25.00
3024	LC. REVELER (C. Nebo x Lc. Mrs. Harold Lloyd) A winter and spring bloomer of good size and medium color.	3 1/2" 4"	10.00 12.50
3032	C. APALACHEE (C. Cowaniae x C. Nebo) Late spring and early summer bloomer, resembling Mossiae.	5" 5 1/2"	17.50 20.00
3033	C. WESTERN HORIZON (C. Remy Chollet x C. Profusion) Should develop into exceedingly profitable cut flower variety. Free flowering of good average color and quality. Late winter and spring.	3" 3 1/2" 4"	7.00 10.00 12.50
3044	C. AMEDEE (C. Talisman x C. Nebo) An exceedingly free winter bloomer resembling a good colored Mossiae. Flowers of good size. It is a most productive cut flower variety.	3 1/2" 4" 4 1/2" 5"	12.50 15.00 17.50 20.00
3049	C. AMBAZAC (C. General Pulteney x C. Talisman) Late winter and spring bloomer of good size and medium color.	4" 4 1/2" 5" 5 1/2"	15.00 17.50 20.00 25.00

Cross No.	Name, Parentage and Description	Size	Each
3053	C. CAJON (C. Profusion x C. Adeyne) Late winter and spring bloomer of good size and color.	3 1/2" 5"	\$10.00 17.50
3077	C. PIQUA (C. Gravesiana x C. Profusion) Spring and early summer bloomer of fine shape, size, substance and good color.	4"	15.00
3078	C. JANET (C. Santa Monica x C. Monarch) Blooming in the winter and early spring a most worthwhile Cattleya of medium color, good form and free flowering. A few nice alba forms of white and ivory petals have appeared.	4" 4 1/2" 5" 5 1/2"	15.00 20.00 25.00 30.00
3079	LC. SURYA (Lc. Tartan x C. Monarch) A free flowering spring bloomer of medium to rich color.	4" 4 1/2" 5"	15.00 20.00 25.00
3087	C. ISOLDE (C. Talisman x C. Robert de Wavrin W'birt. var.) Late winter and early spring. Exceedingly free flowering. Medium in color.	3" 4"	10.00 15.00
3127	BLC. ADVENTURER (Blc. Ursula x C. Intertexta) Exceedingly large Brassocattleya blooming usually in winter and spring, but is variable. Sepals and petals are deep lavender to light rose. The lip in which the fringe is considerably reduced is most attractive with an orange throat.	3 1/2" 4"	15.00 20.00
3128	BLC. GERONIMO (L. purpurata x Blc. Ursula) This is an exceedingly large Brassocattleya similar to Blc. Ursula but darker in the lip.	4"	20.00
3145	C. PRISCILLA MULLENS ALBA (C. Brussels alba x C. Mossiae Reineckiana) A spring and summer bloomer similar to C. Mossiae Reineckiana. Flowers are large. Sepals and petals are white, prettily fringed with crimson-purple veining at the base and strong yellow in the throat.	4" 4 1/2" 5" 5 1/2"	25.00 30.00 40.00 50.00
3157	C. PESCADO (C. Cassadaga x C. Profusion) Spring bloomer, exceedingly free flowering. Similar in color to C. Mossiae but more flowers to the spray and usually a better shape.	3 1/2" 4"	10.00 12.50
3164	C. VANIR (C. Mossiae x C. Gravesiana) Spring and early summer bloomer strongly resembling C. Mossiae in habit and appearance.	4" 4 1/2" 5"	10.00 12.50 15.00
3167	C. SIR PERTINAX (C. Sir Walter Scott x C. Mossiae) Resembling C. Enid in general form but with a more fixed flowering season which is spring and summer.	3 1/2" 4" 4 1/2" 5"	10.00 12.50 15.00 20.00
3170	C. MRS. F. KNOLLYS (C. Hardyana x C. Mossiae var. Countess Grey) Variable as to season this is a free blooming Cattleya. Rich rose sepals and petals with a darker lip veined with gold.	4" 4 1/2" 5" 5 1/2" 6"	15.00 20.00 25.00 30.00 35.00

Cross No.	Name, Parentage and Description	Size	Each
3210	C. VARUNA (C. Intertexta x C. Annie J. Lines) Exceedingly strong growing hybrid producing flowers of intense color. Variable as to flowering season, late fall and early winter predominating.	3 1/2" 4" 4 1/2" 5" 5 1/2" 6"	\$12.50 17.50 22.50 30.00 35.00 40.00
3228	LC. JUAREZ (Lc. Marie Dobrott x Lc. Massasoit) A large and fine flower with rich color. Sepals and petals are lavender-rose with an intense crimson lip veined with gold.	4"	20.00
3229	LC. HALONA (Lc. Marie Dobrott x C. Profusion) Like all Lc. Marie Dobrott hybrids this is vigorous and free flowering. Flowers are large. Sepals and petals are medium rose. Lip darker with a yellow area in the throat and some gold veining.	3 1/2" 4" 4 1/2" 5"	12.50 17.50 22.50 30.00
3317	C. ATROPOS (C. Intertexta x C. Santa Monica v. Goliath) A spring bloomer of good shape with full petals and a lip dark crimson-purple at the base with a light yellow throat.	3 1/2" 4" 4 1/2"	12.50 15.00 20.00
3359	LC. VESTMENT (Lc. Hassallii alba x C. Eleanore alba) A good alba variety having white to ivory sepals and petals. An extra dark purple lip with light yellow throat. Variable as to flowering season.	3" 3 1/2" 4" 4 1/2"	15.00 20.00 25.00 30.00
3381	LC. GATTON GLORY (C. Mimosa x Lc. Canberra Stonehurst var.) This well-known hybrid varies in color from chartreuse through yellow to deep burnt orange sepals and petals with red lips to harmonize. Usually a summer bloomer it is a most attractive Cattleya.	3" 3 1/2" 4" 4 1/2"	15.00 17.50 25.00 30.00
3452	C. HEYDAY (C. Profusion x C. Prospector) With us, late winter and early spring. Good size and good color. Excellent shape. A fine commercial variety.	3" 3 1/2" 4" 4 1/2"	10.00 15.00 20.00 25.00
3473	LC. FASCINATOR-MOSSIAE X C. WOLTERSIANA Spring and early summer bloomer. Unflowered as yet.	2-2 1/2"	5.00
3474	LC. TOCCATELLA (Lc. Fascinator-Mossiae x C. Serenity) Blooming for the first time this spring the flowers have a surprising amount of color. We expect this to prove an excellent Easter and Mother's Day Cattleya.	3" 3 1/2" 4" 4 1/2"	10.00 15.00 20.00 25.00
3478	LC. PHAETHON (Lc. Fascinator-Mossiae x Lc. Wellsiana) The few plants which have flowered of this cross indicate an exceedingly free flowering spring and early summer hybrid. These early ones resemble somewhat Lc. Canhamiana but with more color in the lip.	2-2 1/2" 3" 3 1/2"	5.00 7.00 10.00
3489	C. TRIDENT (C. Trimos x C. Mossiae) Definite spring and early summer bloomer. Greatly superior to Mossiae. Amazing production.	2-2 1/2" 3" 3 1/2" 4"	6.00 9.00 12.50 15.00
3501	LC. FASCINATOR-MOSSIAE ALBA X C. BRUSSELS ALBA Very few of this cross have bloomed as yet but they indicate an exceedingly free flowering alba with pure white sepals and petals and a definite C. Mossiae lip. A very worthwhile alba.	2-2 1/2" 3" 3 1/2" 4"	12.50 15.00 20.00 25.00

Cross No.	Name, Parentage and Description	Size	Each
3502	LC. PROCA ALBA (Lc. Fascinator-Mossiae alba x C. Ardmore alba) Similar to No. 3501 with perhaps finer form. Exceedingly free flowering in spring and summer.	2-2 1/2" 3" 3 1/2" 4" 4 1/2"	\$12.50 15.00 20.00 25.00 30.00
3527	LC. SHAMASH (C. Dupreana x Lc. Hyeana) Exceedingly rich color and free blooming. Dramatic appearance but greatly lacks shape. May prove valuable as spring bloomer with high color.	2-2 1/2" 3" 3 1/2"	6.00 9.00 12.50
3539	LC. ENLIL (C. Dupreana x Lc. Tartan) Late spring and summer bloomer resembling C. Dupreana but darker in color and showing the Laelia influence in shape. Free and very worthwhile.	3" 3 1/2" 4" 4 1/2"	9.00 12.50 15.00 17.50
3544	LC. DEMOPHON (C. Prospector x Lc. Fascinator-Mossiae) The few that have bloomed show an unexpected amount of color. Large and exceedingly free flowering.	3" 3 1/2" 4"	9.00 12.50 15.00
3553	C. CELTICA (C. Mossiae x C. Woltersiana) An exceedingly free flowering spring bloomer of Mossiae type.	2-2 1/2" 3" 3 1/2" 4"	5.00 7.00 10.00 12.50
3560	C. GAMUT (C. Prospector x C. Dinah A. M.) This proved to be finer than we had anticipated. The flowers are of perfect form and are a warm rose-pink color with a darker lip. Very large, free flowering and a vigorous grower. Spring and summer seem to be the season although it is somewhat variable.	3" 3 1/2" 4" 4 1/2" 5"	15.00 17.50 25.00 30.00 40.00
3563	C. TAHMURATH (C. Mossiae x C. Dinah A. M.) The C. Dinah parent is not so dominant in this cross as it usually is. The flowers show much of C. Mossiae form but those we have seen have a solid colored lip and bloom during winter and spring.	2-2 1/2" 3" 3 1/2" 4" 4 1/2"	7.50 12.50 15.00 20.00 25.00
3564	C. IRAN (C. Harold x C. Prospector) Best described as intermediate between both parents. Blooming late spring and early summer this is an exceedingly free flowering Cattleya and well worthwhile from the cut flower point of view.	2-2 1/2" 3" 3 1/2" 4" 4 1/2"	5.00 7.00 10.00 12.50 15.00
3568	LC. CANTABILE ALBA (Lc. Fascinator-Mossiae alba x C. gigas, Frau M. Beyrodt) Exceedingly free flowering alba blooming in the spring and early summer. Flowers are large. Heavy white sepals and petals with solid crimson-purple lip with yellow throat.	2-2 1/2" 3" 3 1/2" 4"	12.50 15.00 20.00 25.00
3570	C. MIMIR (C. Mount Royal x C. Prospector) Fall and winter bloomer. Flowers are large of good shape. Warm rose-pink sepals and petals with a darker lip and some yellow and gold in the throat.	2-2 1/2" 3" 3 1/2" 4" 4 1/2"	6.00 10.00 15.00 17.50 22.50
3617	C. DOWIANA AUREA (Species) About the fifth batch of C. Dowiana aurea x C. Dowiana aurea we have raised. The parents were selected varieties and all the resulting seedlings are good, some exceptionally so.	3" 3 1/2" 4"	12.50 15.00 20.00

Cross No.	Name, Parentage and Description	Size	Each
3619	C. EPICURE ALBA (C. Brussels alba x C. Dowiana aurea) Ivory sepals and petals. Crimson-purple lip which is heavily veined with gold and some gold area in the throat. A free flowering spring and summer bloomer.	3" 3 1/2" 4" 4 1/2"	\$15.00 20.00 25.00 30.00
3621	LC. HASSALLII ALBA X C. FABIANID ALBA Unflowered as yet there can be little doubt that this cross will prove a large alba with clear white sepals and petals and a rich dark purple lip with yellow throat. The season may be variable. At the prices quoted it is a good speculation.	2-2 1/2" 3" 3 1/2" 4"	12.50 15.00 20.00 25.00
3624	LC. KRONOS (Lc. Valencia x Lc. Britannia) Still somewhat variable the season appears to be late summer and fall. A most worthwhile hybrid of excellent shape and size. Sepals and petals are a warm shade of lavender-rose. The lip is deep crimson with some gold in the throat. The petals are sometimes feathered at the tips with crimson.	2-2 1/2" 3" 3 1/2" 4" 4 1/2"	7.50 12.50 17.50 25.00 30.00
3647	C. CORFLAMBO (C. Jicarillo x C. ardentissima) We are offering this seedling for the first time. Those few we have seen bloom are all of intense color and of the regular Cattleya shape with good texture. The season will doubtless be late summer and fall. An exceedingly rich colored Cattleya suitable for exhibition, cut flower purposes or for breeding.	2-2 1/2" 3" 3 1/2" 4"	15.00 17.50 22.50 30.00
3648	C. TETHYS (C. Annie J. Lines x C. ardentissima) Closely related and similar to No. 3647 this hybrid is every bit as rich and, if anything, of finer texture. The best varieties of this cross will prove, we are confident, excellent parents for developing strong colored hybrids blooming in the fall and winter. The average quality and evenness of color have been very good.	2-2 1/2" 3" 3 1/2" 4" 4 1/2"	15.00 17.50 22.50 30.00 35.00
3650	C. ALWYNII ALBA (C. Enid alba x C. Amabilis alba) Our strain of this well-known alba was bred from choice parents. Has fine texture, shape, clear white sepals and petals with a dark lip.	2-2 1/2" 3" 3 1/2" 4" 4 1/2"	12.50 15.00 20.00 25.00 30.00
3836	C. WARNERI ALBA X C. LADY VEITCH Unflowered but possibilities for free flowering pure white are excellent. Season most likely to be late spring and summer.	2-2 1/2" 3"	15.00 17.50
3933	C. BRUSSELS ALBA X LC. CYNTHIA Unflowered as yet.	2-2 1/2" 3" 3 1/2"	15.00 17.50 22.50
3950	LC. MORVYTH MAG. X C. ARDENTISSIMA COLOSSUS Another hybrid of immense promise. Lc. Morvyth Mag. has never failed as a parent and bred to C. ardentissima colossus we have reason to expect a superb hybrid of deep strong color, excellent texture and shape. Blooming season probably variable.	1 1/2" 2-2 1/2"	15.00 20.00
3958	LC. GOLDEN BEAUTY A.M. X BLC. NANETTE ALBA While an extremely speculative cross there is little doubt that the result will be a yellow Brassocattleya of fine form, substance and color. We have every confidence in it.	1 1/2"	12.50

Cross No.	Name, Parentage and Description	Size	Each
3971	LC. EDITH WILLKIE X LC. HYPERION We look forward to seeing this one bloom with keen anticipation. Undoubtedly will be large and rich in color and should be a fine form.	1 1/2"	\$10.00
3982	C. ESTELLE ALBA X BLC. QUEEN OF THE BELGIANS Fine white Brassocattleyas are rare indeed. We anticipate that this will be a good one with a somewhat variable flowering season but more should bloom during the winter and early spring.	1 1/2" 2-2 1/2"	10.00 15.00
3983	C. SERENITY X LC. INTEGRITY To those who know these parents this cross needs no explanation. Both are winter bloomers of superior quality. C. Serenity has fine form and substance and Lc. Integrity is equally as fine with more color. The results should be a perfect winter and spring bloomer.	1 1/2"	10.00
4008	C. PROFUSION X C. SERENITY VAR. SPLENDOR We anticipate a winter and spring bloomer of good medium to deep color and excellent texture.	1 1/2"	7.50
4018	C. PROSPECTOR X C. SANTA MONICA VAR. GOLIATH Here is a mating of two of the finest winter blooming Cattleyas we know of. C. Santa Monica var. Goliath has tremendous substance and shape and C. Prospector is, to our mind, the most profitable cut flower Cattleya yet raised. This cross should prove extremely worthwhile.	1 1/2"	10.00
4026	C. EDITHIAE (C. Suzanne Hye alba x C. Trianae alba, Broomhill var.) It may be possible to make C. Edithiae with finer parents but we doubt it. The seedlings offered are extremely well bred and, of course, C. Edithiae is a fine winter pure white Cattleya and very worthwhile.	1 1/2" 2-2 1/2"	10.00 15.00
4027	C. ESTELLE ALBA X C. TRIANAE ALBA BROOMHILL VAR. We expect this cross to be even finer than the preceding one but at present it is unproven. It will definitely be a winter pure white with a yellow throat.	1 1/2" 2-2 1/2"	15.00 20.00
